

CHANDAN GOYAL

Data Analyst | 3+ Years Experience | Bangalore, India

+91-98157-84630 | goyalchandan79@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in **Credit Card Risk Analytics**, specializing in portfolio monitoring, delinquency analysis, risk segmentation, and MIS reporting. Proficient in **SQL, Python, SAS, Alteryx, Excel, and Power BI** for data analysis, dashboard development, and reporting automation. Experienced in vintage analysis, roll rate analysis, portfolio performance monitoring, and regulatory reporting, supporting data-driven credit risk and business decision-making.

TECHNICAL SKILLS & COMPETENCIES

Programming & Analytics: SQL Server, Python, SAS, Alteryx

BI & Visualization: Power BI, Advanced Excel, Dashboard Development, KPI Tracking

Credit Risk Analytics: Risk Segmentation, Delinquency Monitoring, Loan Default Tracking, Bureau Data Integration

Data Management: Data Cleaning, Data Validation, Data Governance, Data Modelling, Data Reconciliation

Reporting & Automation: MIS Reporting, Exception Reporting, Workflow Automation

Cloud & Operating Systems: AWS Cloud, Windows, Linux

Business Skills: Stakeholder Management, Cross-functional Collaboration, Root Cause Analysis

WORK EXPERIENCE

Data Analyst | Metro Bank

June 2023 – Present

- Performed end-to-end credit risk analytics across credit card origination, portfolio monitoring and collections phases to support portfolio growth and risk management objectives.
- Analysed credit card application and onboarding data using **SQL, Python, SAS** and Alteryx to evaluate approval trends, booking quality, acquisition performance and underwriting effectiveness.
- Assessed applicant creditworthiness using bureau data, affordability metrics, income verification, debt-to-income ratio, credit score, utilization behaviour and fraud indicators during the origination phase.
- Developed origination MIS dashboards and KPI reports tracking application volumes, approval rates, decline reasons, booking rate, acquisition channels and TAT, **reducing manual reporting effort by 45%**.
- Performed vintage analysis and cohort tracking on newly acquired credit card customers to monitor early delinquency trends and onboarding quality.
- Monitored portfolio health metrics including **30+/60+/90+ DPD**, roll rates, charge-offs, recoveries, utilization rates, payment behaviour and default trends across the credit card portfolio.
- Conducted exploratory data analysis (EDA), behavioural analytics, and risk segmentation to identify Early Warning Indicators (EWI), high-risk customer segments and emerging portfolio risks.
- Performed roll rate and migration analysis to track customer movement across delinquency buckets, and assess portfolio risk trends.
- Built interactive **Power BI dashboards** for real-time portfolio monitoring and executive risk reporting, **reducing reporting turnaround time from 2 days to 8 hours**.
- Automated recurring portfolio and origination reports using SQL and Python-based data pipelines, **improving operational efficiency and reducing manual intervention by 50%**.
- Conducted data validation, reconciliation and quality checks across multiple banking systems, **reducing data inconsistencies by 30%**.
- Collaborated with underwriting, risk strategy, collections, finance and compliance teams to support Basel-aligned risk reporting and portfolio optimisation initiatives.
